

ARE LOCAL FOODS BETTER FOR MY WALLET?

Directions: As you visit the Farmer's Market today, price the following items and complete the chart. Make sure to write the unit and price per unit for each item. The last two columns of the table, "Store Name" and "Store Price Per Unit," will be completed in the classroom using supermarket advertisements. **If an item is sold by more than one farmer, find two different farmers and list their prices. If an item can be sold in different unit sizes, list the smallest and largest unit size in which it can be purchased. For example, Sweet Corn could be sold by the "Dozen" or by the "Bushel."

You must include the following produce items in your chart below. Required items:

- Blueberries
- Cucumbers
- Sweet Corn
- Onions
- Tomatoes
- One type of melon

Produce Name	Farm Name	Unit Sold	Price Per Unit	Store Name	Store Price Per Unit
Example: Sweet Corn	Powers Farm	One Dozen Ears	\$3.00	Lowe's Foods	\$4.00
Example: Sweet Corn	Powers Farm	One Bushel	\$19.00	N/A	N/A
